This technical drawing illustrates a complex diamond mesh structure, likely representing a geological or structural model. The mesh is composed of numerous black lines forming a dense, interconnected diamond pattern. A prominent vertical line runs through the center, with several horizontal lines intersecting it. The drawing is overlaid with a red grid. Various colored lines and arrows are used to highlight specific features: blue lines and arrows indicate a primary flow or structural direction, while green lines and arrows highlight secondary or specific points of interest. The overall layout is highly detailed, showing the intricate geometry of the mesh and the distribution of the highlighted elements.
